Student Exploration: Building Pangaea

SAVE AS your last name! Now use this document to answer all questions and paste all maps you create. This doc. Will be posted on your wiki when finished.

Log in to www.explorlearning.com and Launch "Building Pangaea"

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

- Antarctica is a frozen land, so cold and icy that no trees can grow there. Yet scientists have discovered **wood** (remains preserved in rock) of ancient trees in Antarctica.
What do you think this means? That Antarctica was once in a warmer spot on the globe.
- The Himalayas in central Asia are the tallest mountains in the world. But fossils of seashells can be found high in these mountains, far from any ocean.
How do you think they got there? The land was once at sea level before the mountains were created.

Gizmo Warm-up

The Gizmo allows you to drag and rotate all the major **landmasses** on Earth.

- To drag a landmass, grab it in the middle.
- To rotate a landmass, grab it near the edge.
- Learn the names of landmasses by holding the cursor over the landmass for a few seconds.

Student Exploration Building Pangaea Worksheets - Kiddy Math

In 1915, Alfred Wegener proposed that all of Earth's continents were once joined in an ancient supercontinent he called Pangaea. Wegener's idea of moving continents led to the modern theory of plate tectonics. Create your own version of Pangaea by fitting Earth's landmasses together like puzzle pieces. Use evidence from fossils, rocks, and glaciers to refine your map.

Building Pangaea Gizmo : ExploreLearning

Student Exploration: Building Pangaea Vocabulary Continental Drift: the theory that the continents are moving very slowly. Fossil: the remains, traces, or imprint of an ancient living thing preserved in rock. Glacier: a large, slowly moving body of snow and ice. Ice age: a time when Earth was very cold and large areas were covered by glaciers. Landmass: a large, unbroken area of land.
