### **Taxonomy, Classification, and Dichotomous Keys**

Classification and the Dichotomous Key Introduction Classification is a system used by scientists to group and sort living and non-living things based on characteristics they share. Sorting things in this way helps us better understand the world we live in. Here are a few ways scientists classify things.

### **Classification and the Dichotomous Key**

Dichotomous Keys The term dichotomous refers to dividing into two parts and in the world of taxonomy it is associated with dichotomous keys. Many scientists regularly use classification manuals to conduct their identification work. Usually it involves the use of a dichotomous key.

### **Taxonomy and Dichotomous Keys: Sequential Content**

The dichotomous key is a method in taxonomy that is used to categorize plants and animals. It is a form of single-access key where there are only two options at each step. The key is a series of questions with yes or no answers that is used to find what groups an organism belongs in by asking about the organisms characteristics.
