### **Theory Machines Mechanisms Uicker John**

Theory of Machines and Mechanisms provides a text for the complete study of displacements, velocities, accelerations, and static and dynamic forces required for the proper design of mechanical linkages, cams, and geared systems. The authors present the background, notation, and nomenclature essential for students to understand the various independent technical approaches that exist in the field of mechanisms, kinematics, and dynamics.

John J. Uicker, Jr. is a Professor of Mechanical Engineering at the University of Wisconsin - Madison. His teaching and research specialties are in solid geometric modeling, modeling of mechanical motion and their application to computer-aided design and manufacture. He received his Ph.D. in mechanical engineering from Northwestern University and joined the University of Wisconsin faculty in 1967. Uicker is one of the founding members of the US Council for the Theory of Machines and ...
